

Construction Industry Safety Coalition Recommendations: COVID-19 Exposure Prevention Plan for Construction

Design Tech Remodeling, LLC takes the health and safety of our employees very seriously. With the spread of the coronavirus or “COVID-19,” we all must remain vigilant in mitigating the outbreak. This is particularly true for the construction industry, which has been deemed “essential” during this Declared National Emergency. In order to be safe and maintain operations, we have developed this COVID-19 Exposure Prevention Plan, based on currently available information from the CDC and OSHA, to be implemented throughout the Company and at all of our jobsites.

COVID-19 Prevention and Work Practice Controls:

Employees Should:

- Ask other occupants to keep a personal distance of six (6-10) feet at a minimum.
- Wash or sanitize hands immediately before starting and after completing the work using soap and water for at least 20 seconds. When soap and running water are unavailable, use an alcohol-based hand rub with at least 60% alcohol. Always wash hands that are visibly soiled.
- Cover their mouth and nose with a tissue when they cough or sneeze or use the inside of your elbow.
- Avoid touching their eyes, nose, or mouth with unwashed hands.
- Avoid close contact with people who are sick.
- Avoid sharing tools with co-workers if possible. If not, disinfect before and after each use.
- Any employee/contractor/visitor showing symptoms of COVID-19 (i.e., fever, cough, or shortness of breath) should notify Design Tech Remodeling immediately and will be asked to leave the jobsite and return home.
- Sick employees should not return to work until the criteria set forth by the CDC and their healthcare provider has been met.

OSHA and the CDC have provided the following control and preventative guidance to all people, regardless of exposure risk:

- Frequently wash your hands, and your child’s hands, with soap and water for at least 20 seconds before and after each meeting. When soap and running water are unavailable, use an alcohol-based hand rub with at least 60% alcohol.
- Avoid touching your eyes, nose, or mouth with unwashed hands.
- Follow appropriate respiratory etiquette, which includes using a tissue for coughs and sneezes, throwing away the tissue, and washing your hands for at least 20 seconds.
- Avoid close contact with people who are sick. If you have come in contact with anyone that has the virus, please notify us immediately at 414-915-1710.
